

JORGE RUIZ DE LA TORRE BERTOLÍN

Computer Engineer • Full Stack Developer • Web Platforms & AI Integration

Miami, Florida • Valencia, Spain • jorge@macdiego.com • [linkedin.com/in/jorgerdelat](https://www.linkedin.com/in/jorgerdelat) • jorge-tech.vercel.app • github.com/Crane97

SUMMARY

Full Stack Developer focused on web applications, software platforms, and AI integration for business processes. Experienced in backend development with Java, Spring Boot, and C#/.NET, frontend development with React and Angular, and data integration (ETL, EDI, REST APIs). Currently applying LLMs, web crawling, and automation to build commercial intelligence tools. Comfortable working across technical and business teams to turn requirements into practical software solutions.

TECHNICAL SKILLS

Languages	Java, TypeScript, JavaScript, Python, C#
Web Development	React, React Router, Angular, Vite, HTML/CSS
Backend & Platforms	Spring Boot, .NET, REST APIs, SQL databases, JWT
AI & Automation	LLMs, Gemini API, Prompt Engineering, Web Crawling, Cursor, Claude Code
Data Integration	ETL, EDI, ERP integration
Cloud, Testing & Tools	Vercel, Cloud Computing, Stripe, JUnit, Mockito, SonarQube

EXPERIENCE

Zumex Group - Customer Success	Miami, FL Jan 2026 - Present
- Zumex Dealers & Distributors Scraping: single-handedly designed and built an AI-powered platform (web crawling, PDF analysis, and LLMs) that researched 206 HORECA equipment dealers across North America and shortlisted 70 for a tailored commercial program, with incentives negotiated against defined qualification criteria. - Collaborate with sales, marketing, and technical teams on customer experience and dealer network development initiatives. - Take part in trade shows and customer meetings, supporting product presentations.	
Solera Inc - Full Stack Developer	Seville, Spain Sep 2022 - Dec 2025
- Joined through an intensive, hands-on software development bootcamp focused on modern technologies (Sep–Nov 2022). - Contributed to a Data Integration Middleware (ETL) project, developing and enhancing data integration features. - Built backend and frontend features using C#/.NET and React.js. - Worked on unit testing and cloud computing, focusing on process optimization, scalability, and legacy system modernization. - Collaborated with cross-functional teams to translate business requirements into technical solutions.	
Capgemini - Software Engineer	Valencia, Spain Jun 2021 - May 2022
- Developed backend features using Java Spring Framework. - Built test coverage from scratch with JUnit and Mockito on a codebase with no up-to-date tests (existing ones were obsolete), tracking quality metrics in SonarQube. - Trained and supported new interns on the development team.	
Edicom SL - Consultant	Valencia, Spain Jun 2020 - Mar 2021
- Worked on EDI data integration and automation, transforming ERP data into standardized formats and configuring external connections. - Validated data exchanges with clients to ensure accurate transmission and regulatory compliance.	

EDUCATION

Bachelor's degree in Computer Engineering – Universitat Politècnica de València / INSA Lyon	Sep 2015 - Jul 2022
Software Engineering specialization	
Final Degree Project • Coworking Management System: Angular + Spring Boot + MySQL web platform with JWT authentication, bookings, and Stripe payments.
